Topic or description of issue:	Private for Hire Code does not explicitly call out which insurance policy a driver should present if involved in an accident while providing private for hire service.
How is this impacting your industry?	As a result, some driver have issued their personal insurance policy rather than the company policy leading to delays in settling claims, or in some cases claims being rejected.
Reason to change the regulations?	This can have a significant impact on drivers and consumers/riders injured as a result of an accident.
Proposed solution:	Add the following language to all relevant sections of City Code:

In the event a driver is involved in an accident while providing private for hire service, the driver is required to exchange drivers license information and the private for hire company insurance policy information, at the time of the accident, to all parties involved.
